- ⊗ Business & Meeting rooms
- ⊗ Commercial AV Integration
- ⊗ Digital Signage Systems
- ⊗ Video & Audio Conferencing
- ⊗ Sound Systems (Installed/Portable)
- ⊗ Control Systems

Permanent Installation Solutions

Unified Audio-Visual Systems Ltd utilizes a three phased approach to manage the end-to-end delivery of our sound, light and visual systems solutions service in both commercial and residential environments.

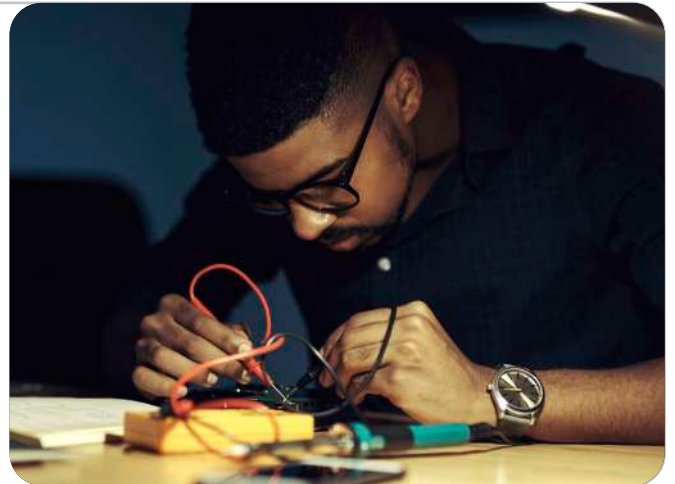

Design

In order to identify your needs, we follow a collaborative approach to the process, starting with information gathering during a site visit. This allows us to propose solutions that meet organizational standards and budget requirements.

Installation

Once we have agreed upon the audio visual design, we will deploy a team of technicians to your site and proceed with the permanent installation of your system. As part of our installation, we will provide you with indepth training to enhance an understanding and operation of the system.

Support & Maintenance

Now that the system is up and running, you're all set to go, but we won't leave you hanging! Our team will be with you post-installation to ensure that you are satisfied with your new investment. This will be followed up with regular maintenance visits to give your audio visual solution the continued care it deserves, thereby ensuring its potential is fully utilized at all times.

Other Services

Rental / Hire

Unified Audio Visual Systems Ltd invests in reliable, quality, industry standard products to ensure that your guests' event experiences are always enhanced when using our equipment and solutions. We work closely with you to determine the objectives of your events and develop a creative solution that

effectively meets your needs and budget in the most efficient manner possible. If it is sound, light, visuals, staging, trussing or everything else in between that you need for your event, business or function, then look no further, because Unified Audio Visual Systems Ltd have you covered.

Audio Visual Content Development

The audio visual content development aspect of a client's brand is often overlooked. At Unified Audio Visual Systems Ltd, we believe that it is just as important as other aesthetics of your physical and virtual venues. What should your customers hear and see at your venues? How fast or slow should

the music be? At what time of the day should you transition into other musical genres? What colors and imagery should you project on your interior? These are all questions that our team of specialists can discuss with you, advise you on and ultimately help you answer.

Our Sample Projects

Serena Hotel Audio Visual Extron programming

Videowall for continental reinsurance

Standard Group Videowall 1 in Partnership with Naschan

Finnfund video conferencing solution with Planning Interiors LTD

End-User Training

In the digital age we live in, technologies are an essential part of any progressive business strategy. It is therefore widely accepted that investment in robust technology and unified collaboration plays a pivotal role in an organization's success while offering the expectation of enhancing workplace performance and productivity.

Unified Audio Visual Systems Ltd provides end-user training which helps in increasing user engagement with the system. We provide detailed knowledge to your workforce that involves system usage and troubleshooting in case of system malfunction before our support staff are involved.

For Presentation Solutions our training involves Cabled presentation solutions offered to the client as well as any wireless presentation solutions. Materials shared to the client include system schematics and any other material related to the installed system. Furthermore, with our end-user training services, collaboration is enhanced for improved teamwork and productivity. We consider your organizational culture, office layout, and user preference when designing the training solutions
